

The current Dive Story app will be discontinued as of 1 April 2025. We invite users to transition to the Dive Story Pro app through a simple and convenient process without losing their saved dive logs.

**With the Dive Story Pro app, you will receive the following benefits:**

- Faster and smoother performance
- More features and enhanced content
- Optimised user interface
- Ongoing updates and support

**Follow the steps below to transition to the Dive Story Pro app:**

1. Go to the App Store for iOS devices or Google Play for Android devices to download the new Dive Story Pro app.
2. Once downloaded, open Dive Story Pro and create an account.
3. Return to the Dive Story app, navigate to the dive logs page, tap the upload cloud backup button in the top right corner.
4. Enter the same email address used for the Dive Story Pro account.
5. Tap 'Complete' and your Dive Story dive logs will begin transferring to the Dive Story Pro app.

Instructions with pictures for logbook registration and transferring logs are displayed in the Dive Story app when you launch it.

Please note that the Scorpenna brand does not support nor develop the app and synchronisation with the app is optional.
